Issues Found (18)

6 Critical | 12 Warning

AUDIT CHECK	STATUS	RECOMMENDATION & FIX
Google index status	CRITICAL	Ensure your site is indexable by Google. **How to fix:** Check robots.txt for "Disallow: /" and ensure the <meta name="robots" content="noindex"> tag is removed.
Google Web Analytics	PASS	Connect Google Analytics to track visitors.
Site Loading Speed Test	CRITICAL	Optimize assets to load under 2.5s. **How to fix:** Compress images, minify CSS/JS files, and use a Content Delivery Network (CDN).
Robots File	CRITICAL	Provide a valid robots.txt file. **How to fix:** Create a robots.txt file at your domain root (e.g., example.com/robots.txt) declaring crawl rules.
HTML Sitemap	CRITICAL	Include an HTML sitemap for easier navigation. **How to fix:** Generate an XML sitemap and reference it in your robots.txt or submit it via Search Console.
Friendly URLs	PASS	Use descriptive, keyword-rich URLs.
Broken Links	CRITICAL	Fix or remove any 404 links on the page.

AUDIT CHECK	STATUS	RECOMMENDATION & FIX
		How to fix: Check for typos in your <a> tags and update any links pointing to deleted pages.
Meta Description	WARNING	Provide unique meta descriptions. **How to fix:** Add a <meta name="description" content="..."> tag between 120-160 characters.
Meta Title	WARNING	Ensure titles are unique and under 60 chars. **How to fix:** Update the <title> tag to be unique and include your primary keyword at the beginning.
Keywords	PASS	Optimize for primary and secondary keywords.
Duplicate Content	PASS	Avoid exact duplicate content across pages.
URL Canonicalization Test	WARNING	Set canonical tags to prevent duplicate indexing. **How to fix:** Add a <link rel="canonical" href="..."> tag to tell search engines which URL is the preferred version.
Image Alt Tag Missing	WARNING	Add descriptive ALT text to all images. **How to fix:** Ensure every <img> tag has an alt="Description" attribute for accessibility and SEO.
Responsive Image Test	WARNING	Serve appropriately sized images. **How to fix:** Use "srcset" and "sizes" attributes or modern CSS (object-fit) to ensure images adapt to screen sizes.
Modern Image Format Test	WARNING	Use WebP or AVIF image formats. **How to fix:** Convert JPEG/PNG images to WebP or AVIF for better compression without quality loss.
Detailed Image Alt Audit	WARNING	Ensure all images have valid alt attributes for accessibility and SEO. **How to fix:** Audit your code for <img> tags with missing alt attributes and add meaningful descriptions.
Inline CSS Test	CRITICAL	Move inline CSS to external stylesheets. **How to fix:** Remove style="..." attributes from HTML elements and place them in an external .css file.
Deprecated HTML Tags Test	PASS	Remove older tags like <font> or .
CSS Minification Test	PASS	Minify CSS files to reduce size.
Largest Contentful Paint Test	PASS	Optimize the largest element to load quickly.

AUDIT CHECK	STATUS	RECOMMENDATION & FIX
Cumulative Layout Shift Test	PASS	Specify dimensions for media to prevent shifts.
Heading H1 Tags Test	PASS	Use exactly one H1 tag per page.
Heading H2 Tags Test	PASS	Use H2 tags to structure content.
HTML Page Size Test	WARNING	Keep total HTML size reasonable. **How to fix:** Clean up unnecessary code, comments, and compress your HTML delivery using Gzip or Brotli.
Image Caching Test	WARNING	Set long cache TTL for images. **How to fix:** Set Cache-Control headers to at least 6 months (max-age=15552000) for static image assets.
JavaScript Caching Test	WARNING	Set long cache TTL for JS. **How to fix:** Set Cache-Control headers for JS files to max-age=31536000 (1 year) for better repeat performance.
CSS Caching Test	WARNING	Set long cache TTL for CSS. **How to fix:** Configure your server to send "Cache-Control: public, max-age=31536000" for all CSS files.
Custom 404 Error Page Test	PASS	Create a helpful custom 404 page.
Nofollow Tag Test	WARNING	Use nofollow for untrusted outbound links. **How to fix:** Add rel="nofollow" to any external links that you don't want to pass "link juice" to.
Favicon Test	PASS	Provide a valid favicon.
